

Spring Term 2-How does Music teach us about our Neighbourhood?

About this unit

In each unit, children are asked a question, intended as an entry point for exploring one of six broad Social Themes. These six themes are overlapping. The exploration of each theme accompanies them on their musical journey throughout this Scheme, and hopefully beyond! As the learners grow, the questions and entry points for the Social Themes evolve. All the while, they are encouraged to be responsible and kind citizens of the world and constructive but critical thinkers. The unit question can be discussed throughout each unit up to and including the final unit performance. Musically, students are constantly touching upon all key musical elements and skills, building upon these as they progress through each lesson, unit and year. As well as this, there is also a Musical Spotlight to each unit. This by no means indicates that there is only one musical aspect or concept being considered and developed – it just allows one chosen musical element, aspect or skill to come to the fore for contemplation, discussion and development, for the duration of that unit. In this unit, we ask ‘How Does Music Teach Us About Our Neighbourhood?’ as an entry point for the broad Social Theme of ‘Music Is a Builder of Community and Guardian of Cultural Identity’. Aside from culture and identity, this is relevant to learning topics such as community, nationality, where we come from, team building, sport and other topics, as you, the teacher, see fit. For those who create and perform music, it is often an intimate expression of their deepest feelings, at the core of their personal identity. Listening to and appreciating many different styles and artists, and listening to other people’s music, can teach us a lot about respect and values. This unit sets out sequences of learning around a song in key musical areas which, over time, all contribute towards the steadily increasing development of musicianship:

- Listening
- Singing
- Playing
- Improvising and Composing
- Performing

Year 2 Vocabulary/Spiral Curriculum:

Year 2

Words you need to know: Keyboard, drums, bass, electric guitar, saxophone, trumpet, pulse, rhythm, pitch, improvise, compose, audience, question and answer, melody, dynamics, tempo, perform/performance, audience, rap, Reggae, glockenspiel.

As lessons progress through the year groups, the key learning is repeated, musical skills are reinforced and the learning deepens.

Children quickly become familiar with the musical activities, through which they acquire new, or reinforce previous, musical knowledge and understanding. To support intense and rapid learning, the musical activities are designed in one of two ways:

1. The activities can be a repeat of the previous week, in order to embed and rehearse key musical skills.
2. The activities can be a repeat of previous musical skills but have different

How this unit links to the national curriculum...

In this unit, the Musical Spotlight is ‘Inventing a Musical Story’. You will be learning about all the Foundational Elements of Music with a focus on storytelling, while working implicitly with all the other elements of music as you go through the steps of the unit. Throughout this Scheme of Work, you will be improvising and composing. Composing will include using the Graphic Score app. While working through these activities, you will consider the Musical Spotlight, ‘Inventing a Musical Story’ as a point of inspiration. We already looked at how music is related to storytelling in Year 2 Unit 2, thinking particularly about how patterns, dynamics and tempo can help us in telling a story. What other musical elements or parts of music do you think we can use to help us tell a story? This could be a fruitful class discussion at some point in this unit. You might want to talk about how timbre (the way an instrument or voice sounds) might help us represent particular characters in a story, or how rhythm might add excitement or anticipation to a story. You might want to remember Unit 3’s discussions on feelings and emotions in music, and how these can be used in storytelling. There might be a variety of other ideas that the class could come up with.

content, in order to strengthen and apply previous musical learning.

As the children move through the Scheme, they acquire new knowledge and skills and deepen their understanding and application of previous learning. This spiral approach leads to deeper, more secure learning and musical mastery

Connections Between the Musical Spotlight and the Social Theme

How does 'Inventing a Musical Story' relate to exploring the Social Theme of this unit: 'How Does Music Teach Us About Our Neighbourhood?' Lots of songs talk about what is going on around the singer or songwriter. This is a direct reference to a place and the people living there. Think of the Beatles' Penny Lane: a real song about the place where Paul McCartney grew up. South Korean rapper, Psy, talks about the fashions and habits of people living in the Gangnam district of Seoul in his hit Gangnam Style. Many of the Beach Boys' most famous songs paint pictures of West Coast USA and its surfing and beach communities. Music also reflects or teaches us about our community via less direct 'stories'. Bedřich Smetana's symphonic poem, Vltava (The Moldau) from Má Vlast, recounts the interaction the Vltava (The Moldau) river has with the various communities through which it flows, in Bohemia and beyond. We hear Folk dance rhythms, celebrations and sounds of local nature embedded in the orchestral music. Blues music of the early 20th century was an outlet for (mainly African American) composers to talk about their lives as a disenfranchised and impoverished community. Listening to it now gives us a lot of information about their community at that time. National anthems and football songs are examples of songs that are part of – and describe – how a community sees and understands itself, and what it aspires to.

Unit 4-How does music teach us about our neighbourhood?

KEY CONTENT AND SUGGESTED LESSON IDEAS	SUGGESTED RESOURCES	ASSESSMENT CRITERIA						
<p>As a class, complete the Understanding Music activity in each step. The musical learning in Understanding Music is central to each unit, so please use <i>Improvise Together</i> as an optional activity for variation and enrichment.</p> <p><u>Understanding Music</u></p> <p>This activity supports students in their understanding of duration, pulse, rhythm and pitch. It is designed to bring everyone together at the beginning of the lesson to learn, embed or revisit the music theory required for the year. The musical content and progression of each Understanding Music activity can also be viewed in your Understanding Music Guide.</p> <p>The Musical Features in the Understanding Music Activity for This Unit:</p> <ul style="list-style-type: none"> ● Tempo: 114 bpm (beats per minute = tempo) ● Time signature: 4/4 (four crotchet beats in every bar) ● Key signature: C major ● Rhythmic patterns using: Minims, crotchets and quavers ● Melodic patterns using: C and G 	<p>Charanga</p>	<p>Continuous Assessment Opportunities</p> <table border="1" data-bbox="1325 1078 1686 1230"> <tr> <td data-bbox="1325 1078 1572 1133">Evidence Have you recorded and uploaded?</td> <td data-bbox="1572 1078 1686 1133"></td> </tr> <tr> <td data-bbox="1325 1133 1572 1188">Notable outcomes Musical? Improvise Together

This activity gives the children an opportunity to practise improvising together. There isn't an improvise activity connected to every song, so this can be used as an option. Here, they can practise their ideas together over a backing track. You can take it in turns to play when looping the track.

The Musical Features in the Improvise Together Activity for This Unit:

- Time signature: 4/4 (four crotchet beats in every bar)
- Key signature: A minor The children can use the notes: A and B or A, B and C

In this Unit, the children will listen and respond to the following:

- Step 1: Helping Each Other by Joanna Mangona and Pete Readman
- Step 2: Piano Trio In A Minor Op. 150 I. Allegro by Amy Beach
- Step 3: The Music Man by Unknown
- Step 4: Swing Time: The Way You Look Tonight by Jerome Kern and Dorothy Fields
- Step 5: Let's Sing Together by Joanna Mangona

This content-rich, interactive activity explores the impact that music can have on us, its design and cultural place; contextualising the music your students will listen to. Accompanying each lesson plan is a Listen and Respond Guide, with all the research and information that is needed for the children to complete the tasks and activities you and they will see on-screen.

Each subsequent musical activity that follows Listen and Respond reinforces the learning for musical knowledge and skills that culminate in a performance. The Listen and Respond Activity has three on-screen interactive tabs to work through: 1. Listen This section introduces the music. Let the children listen and make an immediate response to the questions provided. A second listening will enable the class to talk about their answers and make the same or different responses.

2. Respond. The questions in this section begin to draw attention to expressive concepts: dynamics, tempo, texture and articulation. The questions require the children to listen with care to the music and identify the expressive qualities, and how these are being used by the composer and performers to communicate what they intended.

It is important to talk to the children about the opportunities they have to use expressive qualities, e.g. when they sing or play loudly and quietly, or when the steady beat gets faster and slower.

3. Did You Know? This question provides some further information about the music or its composer, or how the song connects with another subject in the curriculum. Teachers should encourage the children to listen, move, dance, march and enjoy the music.

You can use the on-screen prompts to encourage them to talk about the music, how it makes them feel and why, and musical concepts such as beat, tempo and dynamics. 'Did You Know?' will enable you to explore the song's musical, cross-curricular, historical or cultural connections with them.

You will have warmed up your voices in Understanding Music. On the screen, you will have the option to break the song down into manageable learning sections. Add clapping and movement in the relevant sections and have fun! There is an option to follow the score if you wish to see the notated version.

Unit 4 Songs to Be Learnt:

- Song 1 – Helping Each Other by Joanna Mangona and Pete Readman
- Song 2 – The Music Man by Unknown
- Song 3 – Let's Sing Together by Joanna Mangona

On the screen, you will see animated glockenspiels playing differentiated parts. The sheet music is available, but learning by ear at this stage is important – a 'sound before symbol' approach. Instrumental parts are available for the following songs in this unit (this colour denotes deeper learning):

- Step 1 – Helping Each Other by Joanna Mangona and Pete Readman
- Step 3 – The Music Man by Unknown

These are the notes you will be using on glockenspiel or recorder. There are two differentiated parts; Part 1 is the hardest:

Songs	Instrumental Notes	
	Part 1	Part 2
Helping Each Other (Glockenspiel) 4/4, C major, 108 bpm	C, D, E, G (Crotchets)	C, E, G (Crotchets)
(Recorder)	G, A, C (Crotchets)	G, A (Crotchets)
The Music Man (Glockenspiel) 4/4, F major, 130 bpm	F, G, A, C, E (Crotchets)	F, G, A, E (Crotchets)
(Recorder)	F, G, A (Crotchets)	F, G, A (Crotchets)

Children learn a differentiated instrumental part by ear or from notation. The **Musical Progression** document for Year 2 outlines which songs include instrumental parts, the note ranges and their progression.

There are two differentiated parts available for each instrument; Part 1 is the harder part. Some of these parts are challenging, so choose the parts suitable for your class – their skills will build over time.

Think about the differences between improvising and composing. When someone improvises, they make up their own tune that has never been heard before. It is not written down and therefore will never be heard again. If you

write your improvisation down in any way, it becomes a composition and you can play it again with your friends.

The music comes from inside the performer and belongs to them; it's not a question of doing it 'right' or 'wrong'. If the activity is set up properly within correct musical boundaries, children can only succeed.

There are two songs in this unit to improvise and compose with, plus additional opportunities in the *Improvise Together* and *Create a Graphic Score* apps (this colour denotes deeper learning):

Songs	Improvising	Composing	
	3 notes	3 notes	5 notes
The Music Man 4/4, F major, 130 bpm	N/A	F, G, A	F, G, A, C, D
Helping Each Other 4/4, C major, 108 bpm	C, D, E	N/A	N/A

Improvisation

In every unit, there is an opportunity for improvisation and for the children to express themselves. Each week, there is an option within 'Musicianship' to 'Improvise Together' (see above), and with some songs, the children will also 'Improvise with the Song.'

You can improvise all together, in groups or as a solo – you decide. If the children are complete beginners to improvisation, they can use their voices or clap (rhythmic improvisation). Then, they can use one note and progress to two and three notes only when they are ready. Always start the improvisation with note one of the given sequence.

Composition

In every unit, there is an opportunity for composing and communicating the children's musical ideas and feelings.

- The composition could be a class task or an individual task.
- The composition could be presented on its own or as part of the performance of a unit song.

Creating the Compositions – A Whole-Class Activity:

Compose the melody with one person on the whiteboard. Encourage all children to put forward their ideas. After the tune has been composed, children will learn to play it on their instruments, so keep it simple!

You might want to split the class into groups for this activity if the children have access to iPads or computers. Click 'play' on the composition screen and you will hear the backing track. Drag and drop the notes that you want to use in your composition. Note-names are written in the vertical column on the left-hand side.

Option 2: Create a Graphic Score Create Your Own Graphic Score: What Is a Graphic Score? A graphic score is an exciting and creative way to write a musical composition. It involves using shapes, squiggles, letters, pictures and in fact, anything you would like to include that represents the music you are creating.

With a graphic score, you can make up your own rules. You can be as imaginative as you like. Many composers from the 20th and 21st centuries used graphic scores instead of traditional Western European music notation to describe and record their musical ideas.

In this unit, the children will be given the option to create their own graphic score with the title Instruments. They will use their imaginations to decide what will happen in the story and how they will tell it with sounds and instruments.

The children can create their graphic score/s as a class, in groups or individually using the 'Create a Graphic Score' app.

In this app, you have the ability to drag and drop a variety of shapes, instruments, musical symbols and text onto the page, as well as being able to draw your own designs. A graphic score gives you the freedom to assign any sound or action to a specific symbol, so when the music is played, you can follow your score and perform these sounds and actions along to the track. Composing is all about experimenting and finding out what works and what doesn't. Work together, let ideas flow over the backing tracks. Create music freely, in a safe environment with no boundaries. Have fun!

How to Use the Graphic Score App With the given theme or topic for each unit, the children can create their graphic score/s as a class, in groups or individually. Their graphic score/s will represent the music they create. There is an option to add the following to the score:

- A variety of pre-designed shapes
 - A selection of instrumental graphics
 - Musical symbols and even notes
 - Their own text
 - Their own designs and images
 - Colour. The score can represent anything at all, including pitch, dynamics, timbre, tempo, texture or even silence, as well as actions and movement to allow further creativity. Once the score is complete, press 'play' and it will scroll along in time with the backing track provided.
- How Do I Set Up My Graphic Score Using the App?
- Press 'settings' and choose how you want your score to look. You can:
 - Choose a background
 - Decide if you want to see the bar lines and beat divisions
- How Do I Zoom in on Specific Areas of My Score?
- In the bottom right-hand corner of the app, there are + and - symbols which allow you to zoom in on specific areas of your score. If you press 'fit', it will display the entire score. You Can:
 - Use 'Line' drawings/shapes in your graphic score
 - Use 'Block' shapes in your graphic score

- Use pictures of real instruments in your graphic score
- Use notation in your graphic score
- Write and add text into your graphic score For the above, select the relevant tab and scroll through using the up and down arrows. Change colour by selecting the coloured circle. Place onto the score by dragging and dropping. Once on the score, click to enlarge/shrink/rotate, duplicate, move around or delete. Use the SHIFT key to drag in straight lines.

To Create Your Own Drawings in Your Graphic Score:

- Create your own drawings by selecting any of the three pen options to the right of the tabs. There is an option to use a fineliner, a thicker pen and a highlighter. Change the colour of all of them by selecting the pen you want to use and then clicking on the coloured circle above. To Save and Print Your Graphic Score:
- Use the file menu to save and print your graphic score.

Perform with the Song

Perform and share the learning that has taken place in each lesson and at the end of the unit. Here, you have the opportunity to share the fun you had in the lesson. You can sing and add any of the musical activities you have practised with the song/s. Create and present a holistic performance.

This will be a short performance for sharing at the end of the lesson.

As a class, you can perform at any time to an audience. You might decide to organise a special concert at a different time. Talk together with the children about each element of the lesson/s and what they would like to perform. Share thoughts and feelings. It's a good idea to record your 'end of lesson' sharing as part of the formative assessment process. You will have the option to revisit and perform a song/songs of your choice in Step 6 as part of the summative assessment process.

Talk about the progress that has been made. Performing is and should be a wonderful and joyful experience for everyone. It is important for children to learn how to behave when performing and when they are part of an audience. Both are important, and both have a history of custom and practice in different venues, and for different occasions. For some, performing music will become a key part of musicianship. For everyone, regular performance experience and attention to basic performing etiquette enable children to become happy, confident performers who feel at ease participating as part of an audience for other performers.

Theory Quiz (Step 6 only, end of each unit)

This theory quiz summarises all of the musical learning that has taken place in the unit. There is also a more summative, general quiz for the entire year at the end of Unit 6. Each quiz has a different number of questions and can be used to

suit lesson pacing and scheduling appropriately. Each question is multiple-choice and allows you to select the correct answer before moving on.

--	--	--

Unit Summary

Step	Activity 1: Musicianship Options	Activity 2: Listen and Respond	Activity 3: Singing	Activity 4: Playing	Activity 5: Improvising and Composing	Activity 6: Performing
1	Option 1 Understanding Music Option 2 Improvise Together	Helping Each Other	Helping Each Other	Play instrumental parts	N/A	Perform and share what has taken place in the lesson
2	Option 1 Understanding Music Option 2 Improvise Together	Piano Trio In A Minor Op. 150 I. Allegro	Helping Each Other	N/A	Options: - Improvise Together - Improvise with the Song	Perform and share what has taken place in the lesson
3	Option 1 Understanding Music Option 2 Improvise Together	The Music Man	The Music Man	Play instrumental parts	N/A	Perform and share what has taken place in the lesson
4	Option 1 Understanding Music Option 2 Improvise Together	Swing Time: The Way You Look Tonight	The Music Man	N/A	Options: - Compose with the Song - Create a Graphic Score: Instruments	Perform and share what has taken place in the lesson
5	Option 1 Understanding Music Option 2 Improvise Together	Let's Sing Together	Let's Sing Together	N/A	N/A	Perform and share what has taken place in the lesson
6	Option 1 Understanding Music Option 2 Improvise Together Option 3 Theory Quiz	Piano Trio In A Minor Op. 150 I. Allegro	Revisit a song of your choice	Play instrumental parts with your chosen song, if available	Option to revisit Improvise and Compose activities	Perform and share what has taken place in the lesson and prepare for a concert

How this enquiry might be adapted for children of different ages and different abilities?

Dividing up and then combining the pulse, rhythm and pitch of a song or piece can be a fun and useful activity to do as a whole class. You could try this with all of your students together at any moment. It can be good to introduce the topic and to review or build upon combining these three elements as an introduction or 'movement break' for any lesson. First, divide the class into three groups. If you like, you could choose a leader/conductor for each group, who can face their group at the front of the class. Then, take a short song or musical phrase that everyone knows, for example, the song Happy Birthday. One group could start with the pulse of the song, using their feet to find and mark the pulse. The next group can sing the words of the song, at the same time as the first group marking the pulse. The third group can clap the rhythm of the words, without singing. Together in groups, the class is showing how pulse, rhythm and pitch combine to make a song. The next challenge would be for each person to try to do all three elements at the same time. The trickiest thing will be maintaining the pulse with the feet, without confusing it with the rhythm that the hands are clapping. One or two students may master this more easily than the others and they could demonstrate it to the class.

Where is your school based and what are its communities? Where do you and your students come from? Think of music and musicians from those places and communities. How do they help you talk about and understand your community? What new stories could you and your students tell through music and song that would add to the identity and cultural story of your community?

ASSESSMENT

Assessment Criteria in a Spiral Curriculum

Charanga's music curriculum works as a 'spiral'. The children will regularly revisit prior musical learning in order to refresh, consolidate and then build upon knowledge, skills and attitudes. This approach will form holistic, resilient, confident and informed musicians over the course of the curriculum. For this reason, Assessment Criteria may overlap heavily from unit to unit and year to year. This does not mean that the students are unnecessarily repeating the 'same old thing all the time', but rather that the essential core elements that make a well-rounded musician are ever-present as a focus and constantly improved upon, keeping the learner in an ideal 'zone of development' between comfort and challenge.

Assessment Criteria for This Unit

Area 1: Listening and Responding to Music	Area 2: Developing Performance Awareness and Skills, and Building the Foundations of Musical Language
1a: Demonstrates an understanding and appropriate use of musical language (including basic musical elements), from both prior and new learning.	2a: Demonstrates an awareness of pulse/beat when listening, moving to and performing music.
1b: Demonstrates a basic understanding of how feelings can connect with/relate to music.	2b: Demonstrates an understanding and use of basic differences in pitch (high and low) and note duration (long and short).
1c: Demonstrates some basic understanding of musical style.	2c: Demonstrates a basic understanding of the importance of posture and technique when performing.
	2d: Demonstrates an understanding of the basic concepts of improvisation and composition.
	2e: Introduces the performance (any connection to the Social Theme is an added bonus).
