

Our Computing Curriculum Vision

**“Computer Science empowers students to create the world of tomorrow”
Satya Nadella (CEO Microsoft)**

In our computing lessons we ROCK!

Respectful – we use technology with respect and understand the importance of e-safety when using the internet

Open Minded – we are open minded when we learn new things in computing from the principals of coding to exploring digital art

Curiosity – we ask question about computer systems and how they work and begin to understand the importance of technology in our lives and how this is ever changing

Kind – we are always kind online to other users of the internet. We support and help each other to learn new things and to know more about computing and technology

In conclusion, we ROCK!
